

SMART Approval Manager

ROUTE, VIEW DETAILS, APPROVE & CONFIRM ACTIVITIES WITH RIM BLACKBERRY

Syclo Approval Manager easily extends enterprise systems such as SAP, Oracle and IBM to remote employees via their RIM BlackBerry® smartphone devices. Using technology your employees are already used to and comfortable with, you're able to easily and securely extend workflow approvals and requests with this always on, fully integrated mobile product. Right from their Blackberry inbox, remote workers can make management requests or complete sign-offs on employee expenses, travel, timesheets, purchase orders, invoices, service requests and more.

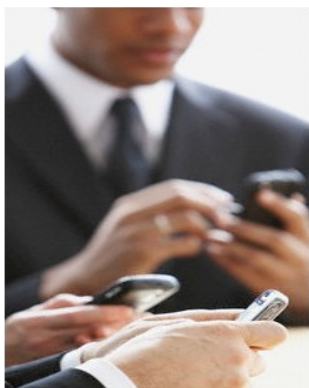

ALWAYS ON AND FULLY INTEGRATED—VIEW TASKS ANYWHERE

The process is simple – information is pulled from your SAP system using Syclo’s proven Agency server. From there it is channeled without replication by your BlackBerry Enterprise Server (BES), categorized and pushed to the appropriate employee using your organization’s existing RIM BlackBerry technology and established workflow procedures.

Employees receive a notification alerting them to a task that requires their attention. They can view the awaiting task and do one of three things – approve/ complete it, reject it or view additional information. After selecting an option, the data travels back through the BlackBerry Enterprise Server (BES) and then through Agency to the enterprise application.

BUSINESS BENEFITS

- No workflow interruptions—immediate access and action regardless of location
- Improve productivity and keep managers/supervisors in the field
- Use existing technology and better leverage smartphone and enterprise investments
- Accelerate and streamline requests and approvals

DESIGNED AS A “SUPER APP”

The SMART Approval Manager was designed as a “Super App” to deliver the same intuitive, compelling user experience RIM BlackBerry clients have come to expect.

We’ve leveraged both the unique capabilities of the BlackBerry platform and application development toolset and paired it with our mobile expertise to offer a workflow application with includes real-time push technology, highly contextualized controls and tight integration.

FEATURES AND FUNCTIONS

Real-time Task Notifications & Actions

- Access, manage, and close/approve tasks from everywhere
- Take immediate action when notified of task
- Reduce bottlenecks and speed process completion
- Keep managers/supervisors in the field

Utilize Existing Technology

- Low architectural footprint impact
- Better usage of enterprise systems and BlackBerry smartphones
- Employees are already accustomed to tools and interface
- Quicker implementations

WORKFLOW APPROVAL & REQUEST TYPES

- Expense
- Invoice
- Leave , Travel and Vacation
- Purchase Order
- Service Order
- Timesheet
- And many more

Syclo's SMART Mobile Suite is a comprehensive family of prepackaged and preintegrated applications, all designed to increase productivity, improve data accuracy, automate workflow and significantly lower operating costs. Products include Work Manager, Service Manager, Inventory Manager, Rounds, Task Tracker and more. Companies can maximize their investment in mobile technology by deploying multiple SMART products across functions.

Syclo's flagship Agentry™ platform provides the flexibility and agility that organizations need to design, develop and deploy customized solutions quickly and cost-effectively. Completely configurable and future-proof, the service-oriented architecture seamlessly integrates with existing systems and supports a variety of languages, peripherals and networks for real-time wireless or offline computing.

ABOUT SYCLO

Since 1995, Syclo has helped more than 750 organizations across industries leverage mobile technology to streamline workflow and improve productivity. Syclo's solutions make data collection and decision making faster, easier and more reliable — reducing costs and driving more value from enterprise systems. Together, Syclo's Agentry™ platform and SMART Mobile Suite products help companies gain a real-time, 360-degree view of operations to support ongoing growth and profitability.
