- Start, hold, create, transfer, edit and complete work orders on the mobile device

ACCESS MAXIMO DATA

- Calibration specs
- Descriptions
- Job plans
- Parts
- Readings
- Repair histories
- Safety guidelines

INSTANTLY CAPTURE DATA

- Notes, parts, tools, labor, failure codes
- Time sheets for individuals and crews
- Automatic audit trails with time stamps, GPS coordinates and e-signature data

BUSINESS BENEFITS

BOOST PRODUCTIVITY

Gain an additional 30-45 minutes of work per shift by streamlining communications, eliminating paperwork and improving decision-making in the field.

REDUCE COSTS

Cut your operations costs by eliminating unnecessary travel, reducing admin overhead and improving management of parts & tools.

GAIN A 360° VIEW OF OPERATIONS

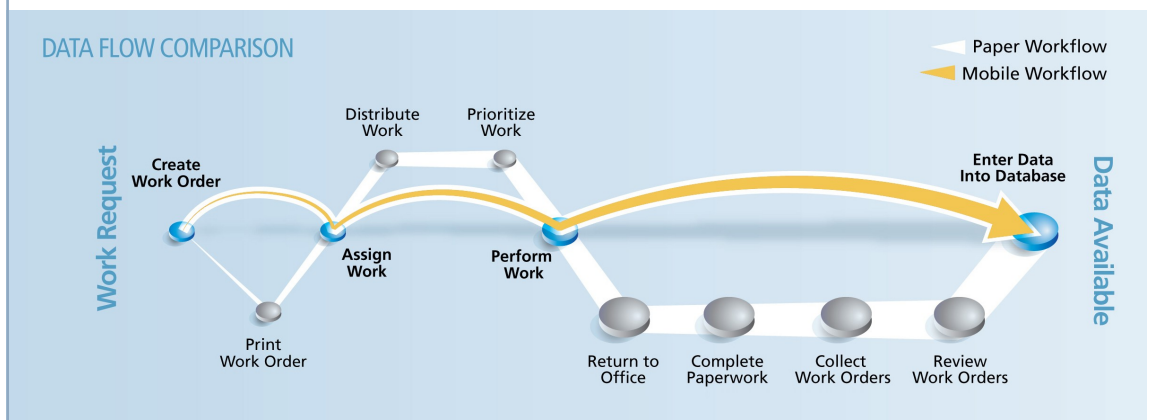

Get better visibility and improved analytics capabilities by capturing and retaining more, higher quality and timelier data.

INCREASE ASSET LONGEVITY

Keep assets running at peak performance with shorter response times, timelier maintenance and smarter asset management programs.

STREAMLINE YOUR DATA FLOW

Reduce the number of steps, activities and personnel required to perform your daily work. Data seamlessly flows in and out of Maximo — with fewer opportunities for miscommunications, errors and data loss.

SMART WORK MANAGER ADVANTAGES

■ CODE-FREE CONFIGURATION

Every part of SMART Work Manager — from integration to application flow to add-on components — can be configured using the intuitive, graphical Agency toolset. Code-free configuration means faster deployments, greater application reliability and lower TCO.

■ EXTREME EASE OF USE

As with all Syclo apps, user experience is priority #1. SMART Work Manager for Maximo offers an intuitive, action-driven interface that only displays information relevant to the user and validates all data and business rules right on the device.

■ CROSS-PLATFORM SUPPORT

SMART Work Manager is built using a model-driven development approach that lets you support multiple devices with the same set of business logic. With no separate sets of code necessary for different platforms, maintenance is affordable and changes are easy.

■ INCLUDED MOBILE DEVICE MANAGEMENT TOOLS

All Syclo mobile apps for Maximo come included with Agency MDM — a leading toolset for remotely deploying, updating, managing and troubleshooting your mobile devices. Agency MDM reduces the risk and TCO of your mobile projects by optimizing device use, minimizing employee downtime and letting you effortlessly scale your deployment.

■ ENTERPRISE-GRADE RELIABILITY

With Syclo's Agency Mobile Platform as its foundation, SMART Work Manager is extremely resilient, easy to manage and scalable to thousands of users. The solution offers 100% availability in the offline mode, swift performance, and reliability backed by a decade of mobile experience.

■ ROBUST, INTELLIGENT INTEGRATION WITH MAXIMO AND OTHER SYSTEMS

In our 10-year relationship with MRO and IBM, Syclo has deployed hundreds of mobile solutions that extend the full breadth of Maximo functionality to mobile users. SMART Work Manager acts as a direct extension of your Maximo software, with seamless data flow, fast synchronization and error-free operation year after year. You can even integrate SMART Work Manager with several systems and databases at a time to achieve the best in functionality and user experience.

Syclo's SMART Mobile Suite is a comprehensive family of prepackaged and preintegrated applications, all designed to increase productivity, improve data accuracy, automate workflow and significantly lower operating costs. Products include Work Manager, Inventory Manager, Auditor, Inspections, Rounds, Schedule and more. Companies can maximize their investment in mobile technology by deploying multiple SMART products across functions.

Syclo's flagship Agency™ platform provides the flexibility and agility that organizations need to design, develop and deploy customized solutions quickly and cost-effectively. Completely configurable and future-proof, the service-oriented architecture seamlessly integrates with existing systems and supports a variety of languages, peripherals and networks for real-time wireless or offline computing.
